Company Profile

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

INTRODUCTION

Cinai IP is a black owned South African Technology company specializing in Voice, Video and Data Communications technologies - providing real business benefits to clients. Cinai IP staffers are all highly experienced professionals - having worked for major vendors and leading consulting houses on large projects.

Vision

To develop a network infrastructure to support the following IT strategic initiatives, develop and support an integrated network infrastructure-voice, data.

Cinai IP Strategic Plan Initiatives for the African Market

- Develop network infrastructure to support research and graduate professional education.
- Develop Wireless hotspots to expand Public Access Networks.
- Assist Government by building the necessary IT infrastructure more aggressively.
- Develop Strategic Partnerships and joint ventures to deliver tangible value

*flexible solutions for
your business needs*

CURRENT FOCUS

Cinai IP has the resources to engage with clients country-wide and Sub Saharan Africa.

Our client base encompasses National Wireless and Fibre Operators, with successful engagements across a broad spectrum of complex Infrastructure Implementations.

It is our focus on the disciplines of providing the best in Technology and Communication Infrastructure Management that has made Cinai IP successful. Other companies might represent a particular product suite, or provide a specific service based on a particular product or technology. Cinai IP's approach is different; we ensure that the *discipline* is effectively implemented, regardless of the technology used.

Being product independent, we also ensure that the solutions provided are effective and aligned with the Business Objectives of our clients..

EXPERIENCE

The Cinai IP team comprises of:

Professionals with extensive experience in the Telecommunications sector specializing in Fixed and Wireless Voice, Data and Video Networks ranging from Copper, **Fibre, Digital, Satellite and Microwave technologies.**

- Customers must benefit tangibly through their dealings with Cinai IP.
- Openness and transparency, in all transactions, and value long – term relationships

We are committed to being a proudly South African company.

Cinai IP's focused approach, adaptability and vendor independence makes it the ideal choice for clients looking to optimize their existing environment, implement new or additional disciplines, or build a multi-vendor management solution. The mission at Cinai IP is to serve as a leading contract and resource provider, delivering customers with solutions designed to ensure that their contracts are managed optimally and business critical infrastructure and environments are managed and operated at the lowest unit cost of operation. Reducing the cost of failure is just one way that we can achieve this.

Cinai IP brings world-class skills, know-how and products to the arena. We provide real solutions to business problems, delivered on time and within budget. solutions, Network Diagnostics/analysis network management systems.

CUSTOM SOLUTIONS

As every customer requirement may differ from one to the next, we are equally flexible to provide our customers with solutions tailored to not only find route cause but also to successfully resolve and eliminate problem areas

EMPOWERMENT

Cinai IP subscribes to the philosophies and policies of Black Economic Empowerment, Employment Equity and Skills development.

Cinai IPs is committed to providing employment opportunities for previously disadvantaged individuals.

We are currently developing a mentorship and internship programme where we hope that we will be able to provide work experience for students from previously disadvantaged backgrounds. Outstanding candidates are offered permanent employment within the company.
